

SPECIFICATIONS

DCI SYNTHETHIC S

Is a two-component, solvent-free polyurethane adhesive specifically developed for the installation of synthetic turf sports surfaces, in particular for those activities requiring substrates with high elastic-mechanical performances. DCI SYNTHETHIC S is a solvent-free polyurethane adhesive, two components: part A, a thick paste and part B, hardener with fluid liquid consistency. DCI SYNTHETHIC S can be applied on damp surfaces, but any residue of standing water which could compromise the complete bonding of the system has to be removed. DCI SYNTHETHIC S is suitable for the installation of systems with homologations such as FIFA.

TECHNICAL DATA

Product identity

	Component A	Component B
Consistency:	thick paste	liquid
Colour:	green	beige
Density (Kg/Lt):	1.8	1.1
Dry solids content (%):	100	100
Brookfield viscosity (mPa·s):	800,000 (# F - 5 rpm)	50,000 (# F - 5 rpm)
Classification:	EN 12004 and EN 12002
