

SPECIFICATIONS

AC MORTAR

Is a light gray single-component premixed mortar based on hydrated lime, hydraulic binders, selected sands and special powder additives. Thanks to its particular composition, the plaster obtained by mixing AC Mortar with water has a good quality adhesion and is particularly suitable for application with plastering machine on almost all substrates. AC Mortar is classified according to the European standard EN 998-2.

TECHNICAL DATA

Product identity

Consistency: powder

Color: grey

Maximum size of aggregate (EN 1015-1) (mm): 2.5

Bulk density (kg/m³): 1,500

Chloride content (EN 1015-17) (%): < 0.05
