

SPECIFICATIONS

CF W 200

Is a bidirectional carbon fiber fabric with balanced weight, characterized by high modulus of elasticity and very high tensile strength that can be placed using two different methods:

- wet system;
- dry system.

by using the following range of epoxy resins:

- Epo Primer ST, suggested for the strengthening of the substrate.
- CF W2, recommended for the leveling of surfaces with a roughness equal or greater than ± 2 mm.

TECHNICAL DATA

Product identity

Tensile strength (MPa) 2800
Modulus of elasticity (GPa) 163
Ultimate strain (%) 1,60
Density (g/cm³) 1,60
