### EPO INJECT HV3

Is a solvent-free epoxy adhesive consisting of two pre-measured components, component A resin, and component B hardener that have to be mixed before use. Epo Inject HV3 has the liquid consistency that can be applied by brush on both horizontal and vertical surfaces. Epo Inject HV3 polymerizes without shrinkage and, after curing, is waterproof, possesses excellent dielectric properties and high mechanical characteristics in addition to its ability to bond concrete and steel. Epo Inject HV3 meets the requirements defined by EN 1504-9 "Products and systems for the protection and repair of concrete structures."

#### TECHNICAL DATA

##### Product identity

	Component A	Component B
Consistency:	Liquid	Liquid
Color:	Greyt	Transparent
Density (Kg/Lt):	1.35	1.05
Dry solids content (%):	100	100
Brookfield viscosity (mPa·s):	250 (# F - 5 rpm)	65 (# F - 5 rpm)
