EPO PAINT IN

Is a solvent-free, two-component, low-yellowing water-based epoxy coating for industrial application. Epo Paint IN is applied using a roller or airless spray system, at various thicknesses from 100 to 150 microns. After hardening, it offers excellent resistance to abrasion. If an anti-slip finish is required, add from 5 to 10% by weight of quartz filler, according to the degree of anti-slip finish required.

TECHNICAL DATA

Product identity

	Component A	Component B
Colour:	RAL colour	straw yellow
Consistency:	liquid	liquid
Density (g/cm ³):	1.60 ÷ 1.70	1
Viscosity at +23°C (mPa s):	4500 ÷ 6500 (# 5 - 50 rpm)	250 ÷ 450 (# 2 - 50) rpm
