

SPECIFICATIONS

FINWALL 200 NHL

Is a one-component, pre-blended, normal-hardening, coarse-grained, skimming mortar available in white, based on natural hydrated lime, selected graded aggregates, admixtures and synthetic powder polymers. Due to its special composition, the mortar obtained by mixing with water is easy to apply with a flat metal trowel and finished with a sponge float. Once cured it has a high bonding strength and can be applied at a maximum of 5 mm.

TECHNICAL DATA

Product identity

Consistency: powder

Color: grey or white

Maximum size of aggregate (mm): 1.5

Bulk density (kg/m³): 1,200

Dry solids content (%): 100
