

TWO-COMPONENT, THIXOTROPIC, FIBER-REINFORCED, CEMENTITIOUS MORTAR WITH A LOW MODULUS OF ELASTICITY AND ADDED ORGANIC CORROSION INHIBITOR FOR REPAIRING CONCRETE, APPLIED IN A SINGLE LAYER AT A THICKNESS OF FROM 3 TO 20 MM.

PRODUCT DESCRIPTION

Fixativ Easy 2K is a two-component, thixotropic mortar with very low emission of volatile organic compounds made from special hydraulic binders, fine selected aggregates, synthetic poly acrylonitrile fibers, synthetic polymers and special admixtures. After mixing with component B, the product forms a mortar with good workability. It is applied by trowel in a single layer from 3 to 30 mm thick to repair and smooth over concrete. Fixativ Easy 2K hardens without shrinking and is characterized by its excellent adhesion to concrete substrates. After hardening, Fixativ Easy 2K has the following characteristics:

- Low modulus of elasticity
- High ratio of flexural strength to compressive strength
- High adhesion to the concrete surface
- Little size variation with respect to hygrometric variation
- Excellent performance in adverse weather conditions;
- Resistance to aggressive chemicals.

SUITABLE SUBSTRATES

- Concrete
- Cement Mortar

FIELD OF APPLICATION

- Repair of degraded concrete sections, corners of pillars and beams, balconies damaged by rusting of reinforcing bars.
- Filling of rigid joints.
- Repair of precast concrete sections.
- Canals and hydraulic projects where waterproof concrete is required.
- Repair of concrete subject to small deformations under loads.

LIMITATIONS

- Do not apply on smooth substrates: roughen surfaces beforehand.
- Do not apply on dry substrates.
- Do not add cement or admixtures.
- Do not add water to the mix to make it more workable once it starts to set.
- Do not leave bags exposed to the sun before use.
- Do not use if the temperature is lower than +5°C.
- Do not use if the bag is damaged or if it has been opened previously.
- Do not use for fixing elements accurately in place.

APPLICATION PROCEDURE

A) Preparation of the substrate

- Remove all deteriorated and loose concrete to form a solid, rough and strong substrate. Any areas previously repaired and which are not perfectly bonded must also be removed.
- Remove all dust, rust, cement laitance, grease, oil and paint from the concrete and reinforcement rods by sandblasting or hydro-sandblasting.
- Treat reinforcement rods with Ferropri-mer 1K or 2K, according to the procedure given in the Technical Data Sheet of product.
- Saturate the substrate with water.
- Before carrying out repairs, wait until excess water has evaporated.

B) Preparing the product

Pour 6 liters of component B into a container and slowly add a 25 kg bag of Fixativ Easy 2K while mixing. Carefully mix the blend for several minutes then remove any powder which has stuck to the sides and bottom of the container. Mix again for several minutes to form a well-blended, plastic consistency, lump-free mixture. Fixativ Easy 2K remains workable for around 60 minutes at +10°C to +25°C.

C) Applying the product

Apply a layer of mortar from 3 to 30 mm thick with a trowel or putty knife; no formwork is required. As soon as the mortar starts to set, tamp the surface with a sponge float. The waiting time required before carrying out this operation depends on surrounding weather conditions. To paint and protect the surface, apply a coat of an elastomeric product or an acrylic product.

COVERAGE / CONSUMPTION

The consumption is approximately 2 kg/m² at 1 mm thickness.

PACKAGING

Fixativ Easy 2K is supplied in:

- 25 kg paper bags
- 6 kg plastic can.

SHELF LIFE-STORAGE

Original sealed bags of this product are guaranteed to be of first quality for 12 months if stored off of the ground in a dry area. High humidity will reduce the shelf life of the bagged product.

SAFETY INSTRUCTION

Fixativ Easy 2K is irritant; it contains cement that when in contact with sweat or other body fluid causes irritant alkaline reaction and allergic reactions to those predisposed. It can cause damage to eyes. In case of contact with eyes or skin wash immediately with plenty of water and seek medical attention. It is recommended to use protective gloves and goggles. For further and complete information about the safe use of our product please refer to the latest version of our Material Safety Data Sheet. **PRODUCT FOR PROFESSIONAL USE.**

TECHNICAL DATA

Product identity		
Class according to EN 1504-3	R4	
Type	PCC	
	Component A	Component B
Consistency	powder	liquid
Color	grey	white
Maximum aggregate size (mm)	2.5	
Bulk density (g/cm³)	1.350	
Density (g/cm³)		1,070
Dry solids content (%)	100	15
Chloride ions content	≤ 0,05%	≤ 0.02
pH		9
Application data (at +23°C and 50% R.H.)		
Colour of mix	grey	
Mixing ratio	25	6
Consistency of mix	thixotropic	
Density of mix (kg/m³)	2,100	
pH of mix	> 12.5	
Application temperature	+5 to +35°C	
Pot life of mix	ca. 1 h	
Waiting time between one layer and the next	ca. 4 h	
Final performances		
Compressive strength (MPa)	50	
Flexural strength (MPa)	11	
Compressive modulus of elasticity (GPa)	25	
Bond strength on concrete (substrate type MC 0.40) according to EN 1766 (MPa)	≥ 2	
Thermal compatibility measured as bond strength according to EN 1542 (MPa)	≥ 2	
Capillary absorption (kg/m²·h)	≤ 0.4	
Impermeability expressed as coefficient of permeability to free water (kg/m²·h)	W < 0.1 Class III	
Permeability to water vapour – equivalent air thickness S - (m)	S < 5 Class I	
Reaction to fire	A1	

WARNING

Danger. Contains Portland Cement: Chromium VI < 2 ppm within the validity period of the product. H315 Causes skin irritation. H317 May cause an allergic skin reaction. H318 Causes serious eye damage. H335 May cause respiratory irritation. P261 Avoid breathing dust. P280 Wear protective gloves/protective clothing/eye protection/face protection. P302 + P352 IF IN CONTACT WITH YOUR SKIN: Wash with plenty of water/... P305 + P351 + P338 IF IN CONTACT WITH YOUR EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. P310 Immediately call a POISON CENTER/doctor/...
