

SPECIFICATIONS

FLATEX

Is a two-component flexible cementitious slurry comprising a liquid polymer and cement-based powder. When are mixed and applied after curing, it forms a flexible, continuous waterproofing membrane. The product protects cement-based plasters and concrete, including those on grade. Flatex meets the requirements defined by EN 1504-2 coating (C) according to the PI, MC, and IR principles ("Protection systems for concrete surfaces").

TECHNICAL DATA

Product identity

Consistency: powder liquid

Color: white and grey White

Bulk density (kg/m³): 1250 1050

Dry solids content (%): 100 50

Classification Standard: EN 1504-2 and EN 14891

Adhesion strength after immersion in basic water according to EN 14891-A.6.9 (N/mm²): 1.54
