

SPECIFICATIONS

ISOCRYSTAL

Is a powder admixture made from special hydrophilic components which, when added to a concrete mix, reduces the permeability of hardened concrete.

TECHNICAL DATA

Product identity

Appearance: Powder

Color: Grey

Density: 2.2 kg/Lt at +20°C

Alkali content (equivalent Na₂O) according to EN 480-12 (%): ≤ 23%

Chlorides soluble in water according to EN 480-10 (%): < 0.1
