

SPECIFICATIONS

MACROFIN

Is a one-component, pre-blended, normal-hardening, coarse-grained, water-repellent skimming mortar available in grey or white, based on cementitious binders, selected graded aggregates, admixtures and synthetic powder polymers. Due to its special composition, the mortar obtained by mixing with water is easy to apply with a flat metal trowel and finished with a sponge float. Once cured it has a high bonding strength and can be applied at a minimum of 20 mm.

TECHNICAL DATA

Product identity

Consistency: powder

Color: grey or white

Maximum size of aggregate (mm): 3.0

Bulk density (kg/m³): 1,300

Dry solids content (%): 100
