

SPECIFICATIONS

PLASTERY MORTAR M10

is a light gray single-component premixed mortar based on hydrated lime, hydraulic binders, selected sands and special powder additives. Thanks to its particular composition, the plaster obtained by mixing Plaster Mortar M10 with water has a good quality adhesion and is particularly suitable for application with plastering machine on almost all substrates. Plaster Mortar M10 is classified according to the European standard EN 998-1 as GP "General purpose mortar for plasters internal / external" category CS III.

TECHNICAL DATA

Product identity

Consistency: powder

Color: grey

Maximum size of aggregate (EN 1015-1) (mm): 1.5

Bulk density (kg/m³): 1,500

Chloride content (EN 1015-17) (%): < 0.05
