

SPECIFICATIONS

SF RUBBERGUM

Is made from engineered rubber granules bound together with high quality polyurethane resin. Using this mat gives the sportive flooring systems a high level of comfort underfoot and good soundproofing capacity against impact noise.

TECHNICAL DATA

Product identity

Weight (kg/m²): 3.0
Dynamic stiffness (MN/m²): 66
Tensile strength (KPa): 470
Recycled materials (%): 100
Density of rubber (kg/m³): 750
Elongation at failure (%): 41
Resistance to heat: up to +80°C
Resistance to cold: down to -30°C
